

SKILL 7

1. To Create Process Escape Sequences, Handle Escaped Spaces, Escape Special Symbols, Preserve Characters, Validate Parser Output, Test Complex Inputs.

To Create Child Processes, Execute Programs, Handle Execution Errors, Pass Arguments, Manage Parent Process, Test Command Launching.

```
#include <stdio.h>

int main() {
    char input[100];

    printf("Enter a command: ");
    fgets(input, sizeof(input), stdin);

    printf("Input received: %s", input);

    return 0;
}
```

Output:

```
shashank@LAPTOP-24KPROR8:~$ gcc escape.c -o escape
shashank@LAPTOP-24KPROR8:~$ ./escape
Enter a command: pwd
Input received: pwd
```

b)

```

#include <stdio.h>
#include <unistd.h>
#include <sys/wait.h>

int main() {
pid_t pid;

pid = fork();

if (pid == 0) {
printf("Child process created\n");
execl("/bin/ls", "ls", NULL);
printf("Execution failed\n");
}
else if (pid > 0) {
wait(NULL);
printf("Parent process completed\n");
}
else {
printf("Fork failed\n");
}
return 0;
}

```

Output;

```

shashank@LAPTOP-24KPROR8:~$ gcc execute.c -o execute
shashank@LAPTOP-24KPROR8:~$ ./execute
